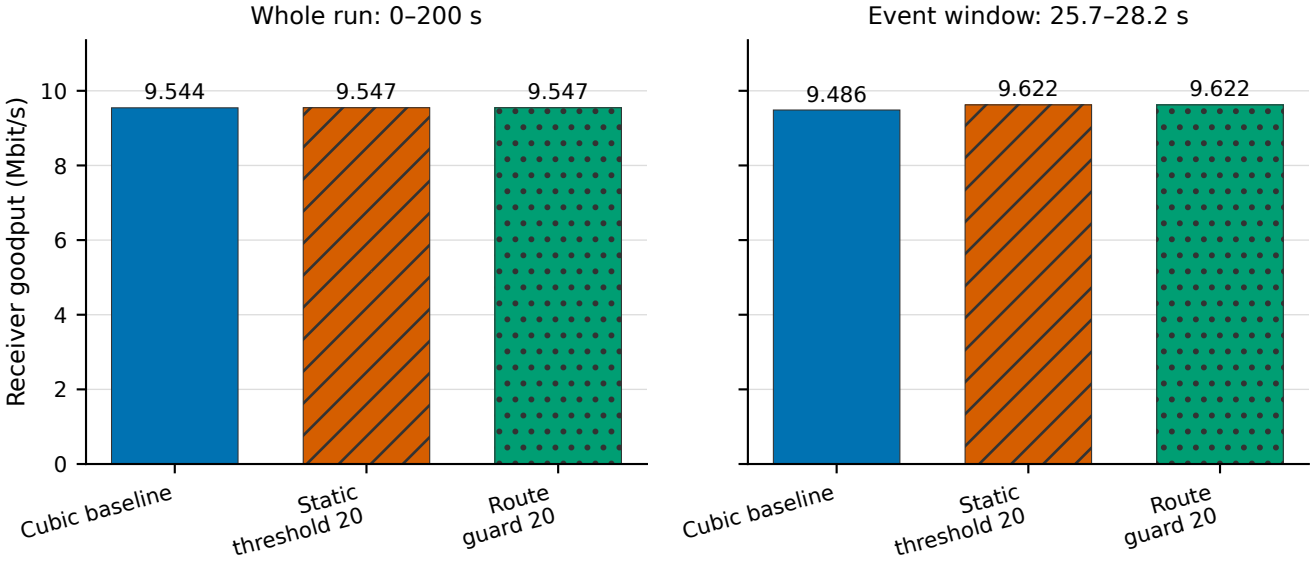
Whole-run and route-event receiver goodput



Exact means (Mbit/s)	whole run	whole Δ	event	event Δ
Cubic baseline	9.544356	+0.000%	9.485568	+0.000%
Static threshold 20	9.546950	+0.027%	9.622464	+1.443%
Route guard 20	9.546509	+0.023%	9.622464	+1.443%

Initial controlled experiment, v4; one trace per case, no statistical interval. All Δ values are relative to the first case.
Both bar axes start at zero and share a scale; event gains do not represent whole-run gains.
